## DETAILED ACTION

### *Response to Amendment*

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-28, 31-69, and 71-76 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stinson et al. (US 6340367) in view of Lukie (US 6375787).

Note in figures 1-5 of Stinson et al., a polymer wire (14) extending spirally in a first direction about a longitudinal axis of the expandable stent (10) and metal wire (16) extending spirally in a second direction about direction about the longitudinal axis, wherein the second direction being counter to the first direction and furthermore, wherein the Stinson et al described the materials formed of metal wire (16) and polymer wire (14) (see col. 3, line 60 through col. 4, line 27 and col. 7, line 65 through col. 9, line 55). However, the stent of Stinson does not form a closed current loop.

Lukie teaches that it is known in the surgical art to have stent that does not form a closed current loop.

For this reason, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the Stinson's stent that does not form a

closed current loop as taught by Lukie in order to enhance the contraction and expansion of the stent.

***Response to Arguments***

4. Applicant's arguments filed 11/06/2007 have been fully considered but they are not persuasive. Applicant's argument with respect to claim 76 has been considered but is moot in view of the new ground(s) of rejection.

***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
